THE UNIVERSITY'S MISSION

The University of Traditional Medicine is a leading school of medical education, medical science and health care, which activity is aimed at training who are aware of their role in a physician-patient relationship, with a high level of morality, in accordance with the requirements of the labor market, unique and unprecedented for national and regional medical education.

THE UNIVERSITY'S VISION

The University of Traditional Medicine (hereinafter the University or UTM) strives to become an institution that: offers educational, ideological, research progressive and curricular educational programs, which are in line with the international educational principles of modern medical education, has effective and efficient management and administration, the necessary infrastructure, modern technologies, training and laboratory facilities, which contributes to the constant and continuous improvement of the quality of education, will ensure the preparation of future national, educated and highly respected physicians who will fully recognize their role in a physician-patient relationship, will be available, affordable and preferred educational institution for various layers of society, regardless of age, gender, race and nationality, beliefs and political preferences, to adapt the proposed curriculum with the fundamental principles of the European Medical Higher Education Area, with special approaches to contemporary and traditional medicine integration, provision of medical science-education programs in line with modern requirements with the introduction of own opportunities will be a high quality educational service provider for the training, re-training and re-qualification of medical personnel in the region education and scientific research will be able to implement a coordinated development strategy. The University of Traditional Medicine was founded in 1991.

University prepares high-level medical scientists who are experienced in using scientific empirical methods of diagnosis and treatment of traditional and modern medicine. Those, displaying clinical flexible thinking, apply their theoretical and practical knowledge, gained during their studies, in practice, combining traditional medicine and modern methods of diagnosis and treatment.

The initiative to invest centuries-old traditional medicine research in the learning process as well as the best service in the field of integrative medicine were highly appreciated during the international conference held in Cyprus in 1998.

The university cooperates with national and foreign institutions and organizations.

We work for the welfare of society.

GENERAL MEDICINE (MBBS)

The department of «General Medicine» was founded in 1991. The head of the department is the Dean: A.Karapetyan. University prepares high-level medical scientists in this field who are experienced in using scientific empirical methods of diagnosis and treatment of traditional and modern medicine. Those, displaying clinical flexible thinking, apply their theoretical and practical knowledge, gained during their studies, in practice, combining traditional medicine and modern methods of diagnosis and treatment.

The specialty was accredited by the Ministry of Education and Science in 2001, graduates receive a state diploma.

The education in the department last 6 years and the total credit of the subjects is 360.

For nearly 26 years the UTM has been preparing medical personnel who possess modern and traditional medicine methods of diagnosis and treatment. University graduates work in theoretical and practical medicine fields in Armenia and abroad.

15 of university graduates are now Doctors of Medical Sciences.

The vast majority of the graduates work successfully as practical physicians, researchers, lecturers, health organizers in leading clinics and medical institutions of not only Armenia but also abroad.
